## EXPERIENCE

### Pixel World eCommerce

Personal Project | 09/2023 - 10/2023

- Designed and crafted a responsive cross-browser-compatible e-commerce web application utilizing HTML, CSS, and React.js, offering users the seamless ability to browse and purchase a wide selection of video games across diverse platforms. This application integrates the RAWG API, providing access to a comprehensive database of over 500,000 video games.

### Hangman Game

Personal Project | 11/2023

- Developed a responsive and cross-browser-compatible Hangman Game using React/Typescript. This game allows the user to guess a word chosen randomly from a JSON File. CSS was used for the styling and responsiveness. The website is Hosted on GitHub pages and can be accessed through my portfolio.

### Crypto Tracker Web App

Personal Project | 07/2023

- Built a Cryptocurrency Data Tracker which displayed a list of Cryptocurrency and its price, volume, market cap, and its name along with the symbol using CoinGecko API. The app is Hosted on GitHub pages and can be accessed through my portfolio.

### Habaneros Mexican Restaurant

Front End Developer | 11/2020 - 05/2023

- Developed two static SEO-optimized and responsive websites for a local restaurant using HTML, CSS, and Javascript for basic functions. Responsible for creating and managing the ads campaign as well as creating content for them. This led to an increase of 50% in organic traffic and a 125% increase in paid traffic.

## EDUCATION
