- Version Control
- React.js
- Figma
- API

PROFESSIONAL EXPERIENCE

Pixel World eCommerce Project
Personal Project

Designed and crafted a responsive e-commerce web application utilizing HTML, CSS, and React.js, offering users the seamless ability to browse and purchase a wide selection of video games across diverse platforms. This application seamlessly integrates with the RAWG API, providing access to a comprehensive database of over 500,000 video games. Users can conveniently add their favorite games to a shopping cart and complete secure checkouts.

Personal Portfolio
Personal Project

This Personal Portfolio Showcase react-powered is a dynamic personal project that underscores my expertise in using React, HTML, CSS, and GitHub Pages to craft a unique and interactive digital portfolio. This project serves as a digital representation of my professional skills and experience, demonstrating at the same time a proficiency in web development and deployment

Restaurant Website / Habaneros Mexican Restaurant
Website Developer & Marketing Administrator

Developed two static SEO-optimized and responsive websites for a local restaurant using HTML, CSS, and Javascript for basic functions. Responsible for creating and managing the ads campaign as well as creating content for them. This led to an increase of 50% in organic traffic and a 125% increase in paid traffic.

Cryptocurrency Price Tracker
Personal Project

Built a Cryptocurrency Data Tracker that displayed a list of cryptocurrencies and their price, volume, market cap, and names along with the symbol using CoinGecko API.

EDUCATION

Bachelor in Computer Science
University of the People
